

**TRANSMISSION—E4OD—NEW DESIGN
INTERMEDIATE BAND APPLY SERVO ASSEMBLY**

**Article No.
95-23-14**

FORD: 1989-1996 BRONCO, ECONOLINE, F SUPER DUTY, F-150-350 SERIES

ISSUE

All E4OD transmissions built after August 7, 1995 have a new design Intermediate Band Apply Servo Assembly (F6TZ-7D021-A). This new design will service all past and present model E4OD transmissions.

ACTION

When replacement of the Intermediate Band Apply Servo Assembly becomes necessary, either design (previous or new) can be used. Some transmissions built after August 7, 1995 do not have the retaining ring groove in the piston bore and only the new design piston and seal assembly can be used. Refer to Figure 1.

CAUTION

WHEN USING THE NEW DESIGN PISTON AND SEAL ASSEMBLY, DO NOT USE THE PISTON ASSEMBLY RETAINER OR RETAINING RING.
